- Onto dry clean surface, splash the enough water and let it surface dry to improve the workability of adhesive. If surface area is larger, provide movement joint every 3 meter.
- Follow concrete expansion joint and connection joint as per standard.

- Mix SUNKOLL NSA SILVER K03, 20 kg. Bag of powder with approx. 6 lt. of clean water. Use slow speed electric stirrer to have desire results. Manual mixing can compromise performance of adhesive.
- Adjust the water quantity as per ambient temperature & surface. The final mix must be workable paste.

How To Apply :

- Spread the adhesive in desire thickness from 3 to 10 mm. onto cement surface using proper notch trowel.
- Once adhesive is applied, fix the tiles or stone onto adhesive before skin formation and press firmly. In case tiles or stone are of big size, also apply the adhesive layer at the back of tiles.
- Leave the space between tiles to have proper grouting and to accommodate surface movement.
- Leave the tiles for 24 hours to bond well and then follow the grouting process.
